

Your Secure Workspace

We make business collaboration secure and simple. Store, share and synchronize your files with our flexible Team Spaces to keep your team, suppliers or customers up to date, anywhere, anytime.

Strengthen your client relationships by using/offering an innovative and direct digital delivery of confidential documents in a highly secure digital vault. The same vault which provides your clients with private storage for their personal files and passwords safely. With Digital Online Vault's e-Delivery, companies can securely deliver documents directly into a client's personal digital vault. e-Delivery is cost efficient for your company due to a paperless procedure when delivering important documents to your clients. Each client benefits by having a secure digital deposit for important documents, which only he or she can access.

Features for Businesses

Team Space

A Team Space is shared storage that can be accessed by multiple members for secure collaboration. A Team space can be for specific members in your organization or between you and your client.

Safe File Synchronization

Synchronize shared files with the SecureSafe Client for PC/Mac so everyone in your team always has the latest version of any file.

Maximum Privacy for your Team

Strong encryption and authentication ensure that only team members can view files in your shared workspace. This is highly suitable for sharing sensitive information such as financial, client and patient data.

Member Management

Invite Team Space members safely with a security code and manage their rights through different user roles and rights.

Notifications and Activity Journal

With email notifications and an activity journal, you can always stay updated on the latest activities in your Team Space.

Safe Web & Mobile Access

Instantly access your Team Space from any browser, iOS or Android device. Your data remains highly secure even with mobile access.

Benefits to You

- Edit files and easily exchange them - Each team member can access the files from anywhere and at any time from the online file safe; edit; and then resave. Everyone will immediately be able to see the current version of the file.
- iOS and Android Apps for travelling - it doesn't matter where and how your team members want to retrieve their documents. Whether in a meetings with customers or at a different location, they can easily and securely access all of the files in the safe. Teamspace is also the ideal solution for working with teams and partners who use a different IT infrastructure.
- Simply open an account to get started - To use Digital Online Vault, you do not need to install anything software so no IT support is required. The service can be used directly in any web browser.

Benefits to Customers

- Highly secure storage for documents, images, and passwords in the personal, digital safe.
- Protected access anywhere and at any time using internet enabled devices with no traces left behind when data is accessed on a public computer.
- Guaranteed confidentiality: no one apart from the customer has access to the data safe.
- When delivering important documents: clear, structured and long-term filing for all type of documents.
- With the data inheritance function, key data is accessible to beneficiaries in case of an emergency.

How is Digital Online Vault Secure?

Designed to protect the privacy of your data. Digital Online Vault employs a range of security measures including renowned encryption methods, strong user authentication and data storage in redundant data centers.

What better place to store your data than a former military bunker in the Swiss mountains
Our data centers are compliant with all banking guidelines and regulations

Digital Online Vault uses several redundant data centers, which are compliant with the security requirements of the Swiss banking commission. So this means that your data is protected physically and digitally using the highest standards possible.

Digital Online Vault powered by SecureSafe was developed in partnership by Contronex, Inc. and DSwiss, AG. Digital Online Vault provides unique, value-added solutions for business' and their clients to ensure the privacy and security of confidential data.
